

[VIDA 2014D Repack install on Windows 10, any version.](#)

Files you need.

2014D_Repack.iso

Patch [2014A-B-D-2099.zip](#)

Click the link above to get the 2099 patch. Unpack it to a folder.

To get the 2014D_Repack.iso Copy the magnet link in the line below to your clipboard.

<magnet:?xt=urn:btih:1b2995ac6b8926893e3dea41c01ce92208b19c8d>

In qBittorrent go to File on the menu then select Add Torrent link.

In the box start a new line and paste the magnet link from the clipboard.

Click download.

Other bittorrent clients have a means to manually add the magnet link.

1. Manually install .net framework 3.5.

- Control Panel\All Control Panel Items\Programs and Features\Turn Windows Features on and off\ Check mark the box for .Net Frame 3.5. Click [OK] wait for .Net Frame 3.5 to install then reboot.

While you are there enable Internet Explorer 11 if it is not enabled

2. In Windows File Explorer navigate to the 2014D_Repack.iso. Select, Left click then Mount.

- The iso will show in the right panel as a DVD drive.

3. Run scripts 1- 3, in the root directory of VIDA2014D_RePack.iso, one at a time.

4. Run the 2099 patch

5. Run Script 4

- **Do not run Script 5**

6. Reboot

7. Wait for Java to request a firewall exception.

8. Wait for Vida monitor to turn green.

9. In Microsoft Edge install the extension IE Tab. Use IE Tab to open <http://localhost/Vida/> this will take you to the VIDA login in page. Approve the install of the IE Tab helper program. How bookmark the VIDA login page. From now on use the bookmark to startup VIDA.

There is also a IE Tab for Google chrome. You can use it to operate VIDA in Google Chrome.

- **Note: Do not uninstall IE11. IE Tab uses the IE11 rendering engine.**

10. Password: admin or 1 - 4 for specific Partner groups.

Clean up: Uninstall Russian language Adobe reader if you are not going to use it. You can delete the short cuts on the Desktop.

If DiCE does not work correctly. Run DiCE setup in :\\3PP\\Products\\DiCE\\

If you get a X in the interface box.

Run VidaMedia:\\Install\\Utils\\EnableIEHostingxxx.reg .

Make sure you run the right one for your operating system.

xxx =x64 is for 64bit operating systems.

xxx =x86 is for 32bit operating systems.
